

Installation/removal of body-mounted filter for SONY A7 Series

1. Angle the bottom section of the filter into the bottom of the camera body first.

2. Lower the top of the filter into place gradually and release it.

3. Once installed, magnets will hold the filter in place.

4. To remove a filter, use a finger to gently angle the top of the filter outward.

5. Use two fingers to gently, but securely grip the edges of the filter to remove it from the camera body.
